1. MISSION. BLT 2/1 commencing at H-Hour on D-Day lands over BLUE BEACH and at L-Hour in landing zone SPARROW; conducts amphibious raid to search for and capture or destroy VC personnel and material within BLT TAOR. Conducts withdrawal within 72 hours.

2. CHARACTERISTICS OF THE AREA OF OPERATION

a. Weather. Objective Area is situated on the Central Coastline of South Vietnam. This area has the least rainfall in the country (Average 38" per annum approx. 20% occurs during NE monsoon).

b. Terrain. The Objective Area is located on a point of land that rises gently from the beach on the southern shoreline to low hills (100-150 meters) 1500 meters inland. The beach is about 3000 meters long and is flanked by two small points. There is a small island located 300 meters off the eastern point at coordinates ZS 278837. There is a 10 meter high sand dune that backs the western half of the southern shoreline (ZS 261848 to ZS 243847). The dune is backed by areas of scrub brush and rice paddies. There is a small hill, 24 meters high, at coordinates ZS 261855. A small hamlet, LANG KE GA, is located on the beach at ZS 273846. An improved road runs from this hamlet in a northwesterly direction to the hamlet of LANG VAN KE which parallels the road from ZS 265855 to ZS 246865. From ZS 257864 the road runs westward and out of the Objective Area. Drainage in the area is good, with the rice paddies offering the only areas of standing water. Movement for the foot troops should be good, except in the rice paddies and loose sand. Tracked or wheeled vehicles will have no difficulty traveling the road. Wheeled vehicle movement in rice paddies and loose sand will be difficult. Vegetation in area consists mostly of scattered areas of scrub bushes and palm trees. This will offer only limited concealment.

c. Hydrography.

(1) See Tab A (Beach Study)

(2) See Tab B (Tidal and Astronomical Data)

**DECLASSIFIED**

### 3. ENEMY SITUATION

a. Composition. Enemy forces accepted in the immediate Objective Area consist of two Local Force companies with a total strength of about 100 men. They have been operating in Southern Binh Dinh Province.

b. Armament. Only known weapons are small arms. If conforming to normal VC Local Force equipment, unit may have 60mm mortars and .30cal machine guns.

c. Reinforcements. No known reinforcing units are located in vicinity of the Objective Area.

#### d. Location of enemy activity in Objective Area

(1) 42 thatched huts at ZS 275885.

(2) New combat hamlet at ZS 273849, 50 huts concealed by heavy vegetation.

(3) Possible weapons cache at ZS 273846 with a VC restricted area from ZS 273846 to ZS 275870.

(4) 7 warehouses vicinity ZS 275870.

### 4. ENEMY CAPABILITIES

#### a. Enumeration

(1) Exfiltration of the Objective Area.

(2) Harrassment of U.S. forces by present forces.

(3) Defend the Objective Area with present forces available.

#### b. Analysis and Discussion

(1) Exfiltration of the Objective Area. This is a very likely course of action for two reasons:

(a) VC force in immediate Objective Area is small.

(b) Conforms to VC tactics when faced by a superior force.

(2) Harrassment of U.S. forces by presently available forces. This is likely to be carried out in conjunction with paragraph (1) above to cover exfiltration and it conforms with VC tactics.

~~CONFIDENTIAL~~  
DECLASSIFIED

(3) Defend with present forces. If complete surprise is achieved this course of action is likely, especially if units are trapped or cut off from escape routes. It is also likely if a large unknown force is in the immediate Objective Area.

5. CONCLUSIONS

a. Relative Probability of Adoption of Enemy Capabilities.

- (1) Exfiltration of the Objective Area.
- (2) Harrassment of U. S. forces by present forces.
- (3) Defend with present force.

b. Governing Considerations. The enemy will probably use a combination of (1) and (2). Harrassment will probably be used to cover withdrawal of VC forces and will probably continue throughout the operation. Recent change in trend of VC tactics indicate possibility of defense if sufficient force can be massed.

c. Effect of Enemy Capabilities of Mission.

(1) Capability (1), (2), and (3) would not effect accomplishment of mission.

1. MISSION. BLT 2/1 commencing at H-Hour on D-Day lands over WHITE BEACH and at L-Hour in landing zone EAGLE, conducts amphibious raid to search for and capture or destroy VC personnel and material within BLT TAOR. Conducts withdrawal within 72 hours.

## 2. CHARACTERISTICS OF THE AREA OF OPERATION

a. Weather. Period of most rain in the Objective Area occurs between September and December (NE monsoon), with showers most frequent during late afternoon. Precipitation during December 15-22 days and rain may be accompanied with gale force winds. Humidity in December averages 85-90 percent. Crachin (periods of wide spread fog and drizzle, very low cloud ceilings below 500 feet and low visibility) are most common in December, usually lasting 3-5 days. Temperatures are in the middle 80's.

b. Terrain. PHU THU is approximately 12 miles south of Objective Area BRAVO. The area east of the CHUA TRUC River is a sand peninsula; the area west of the river consists mainly of rice paddies and clear forest. The northern portion of the Objective Area marks the beginning of a rugged mountain area dominated by Hill 106(BR 976903).

### c. Hydrography

(1) See Tab A (Beach Study).

(2) See Tab B (Tidal and Astronomical Data).

## 3. ENEMY SITUATION

a. Composition. Enemy forces accepted in the Objective Area are:

(1) One VC Main Force (MF) Battalion.

(2) Two VC Main Force (MF) Companies.

(3) Six Local Force (LF) Companies (The LF companies are either in the immediate area or within reinforcing distance).

~~CONFIDENTIAL~~  
DECLASSIFIED

b. Armament. Normal weapons include 60mm and 81mm mortars, .30 cal and possibly .50 cal machine guns, 57mm recoilless rifles and small arms.

c. Reinforcements. The VC have 1 regiment (operating north of the Objective Area) and up to 6 Local Force companies capable of reinforcing present forces in the Objective Area.

d. Location of enemy activity in Objective Area

- (1) Foxholes along path (BR 974895 to BR 976897).
- (2) Large trench at base of hill (BR 974898 to BR 977898).
- (3) 4-8 foxholes and possible tunnel entrance in graveyard (BR 977898).
- (4) Trench on top of ridge (BR 975900).
- (5) Double row of stakes (possibly reinforced with barbed wire (BR 975889 to BR 981890).
- (6) Trench from top of hill to village, with 3 foxholes on down hill side with firing bays (BR 979898 to BR 978898). Trench splits at BR 975898 to form an entrenched area (possible tunnel or bunker at this point).
- (7) Beach at BR 979895 has been cut to allow entry to the CHAU TRUC River. Due to either weather or tides, it has been partially refilled and is impassable for boats.
- (8) Possible bunkers located BR 972899 and BR 972898.

4. ENEMY CAPABILITIES

a. Enumeration

- (1) Exfiltration of the Objective Area.
- (2) Harrassment of U.S. forces by present forces.
- (3) Defend the Objective Area with present forces.
- (4) Reinforce with up to 1 regiment.

b. Analysis and Discussion

(1) Exfiltration of the Objective Area. This is a very likely course of action for two reasons:

DECLASSIFIED

**DECLASSIFIED**  
CONFIDENTIAL

(a) VC force in immediate Objective Area appears to be small.

(b) Conforms to VC tactics when faced with a superior force.

(2) Harrassment of U.S. forces by presently available forces. This is likely to be carried out in conjunction with paragraph (1) above to cover exfiltration and it conforms with VC tactics.

(3) Defend with present forces. If complete surprise is achieved this course of action is likely, especially if units are trapped or cut off from escape routes. It is also likely if a large unknown force is in the immediate Objective Area.

(4) Reinforce with up to one regiment. If carried out, in conjunction with paragraph (3) it would be a change in recent VC tactics

## 5. CONCLUSIONS

### a. Relative Probability of Adoption of Enemy Capabilities

- (1) Exfiltration of the Objective Area.
- (2) Harrassment of U.S. forces by present forces.
- (3) Defend with present forces.
- (4) Reinforce with up to 1 regiment.

b. Governing Considerations. The enemy will probably use a combination of (1) and (2). Harrassment will probably be used to cover VC withdrawal and will continue throughout the operation.

### c. Effect of Enemy Capabilities of Mission

- (1) Capability (1), (2), and (3) would not effect accomplishment of mission.
- (2) Capability (4) would hinder accomplishment of mission.

1. NIS #20

a. Location: The portion of NIS #20 for this operation extends from BR 980895 to GR 000860 with a length of 3100 yards, all usable.

b. Width: 50 to 95 yards at low water; 30 to 59 yards at high water.

c. Gradient: 1 on 10 to 1 on 25, low water to high water; 1 on 10 or steeper, high water zone.

d. Approach: Nearshore bottom slopes steep to gentle shoreward of 18 foot depth contour 250 to 1000 yards from high water line. Off-shore approach partly obstructed by island approximately 3.5 nautical miles off center of WHITE BEACH. Nearshore approach partly obstructed by several wrecks at NW and SE ends of beach.

e. Surf and Tidal Range: Surf 4 foot or greater can be expected 53% of the time in winter; tidal range 4.5 feet (tropic).

f. Material and Firmness: Sand, firm when wet, soft where dry.

g. Terrain Immediately Behind Beach: Beach backed by barren dunes 700 to 2000 yards inland. Large dune, 10 meters high runs down the center of beach. CHUA TRUC River flows from NE part of Objective through the south portion terminating in a large lagoon just south of the Objective. West shore of the river is flanked by lowland and rice paddies giving way to wooded hills in western portion of Objective Area. Northern end is flanked by the river mouth; southern end terminates on a sand beach. Bottom is sand. Several hamlets are on both sides of river bank and at the river mouth.

h. Exits and Communications Inland: Movement across country is blocked by the river, however there are several fording places near the mouth. There are no known bridges.
