SECTION V

LOGISTICS

1. Supply. During the reporting period, difficulty was again encountered in the procurement of certain items. With the influx of new replacements individual equipment has become critical. Items of particular concern are Body Armor, Upper Torso, Fragmentation Protective; Helmet Soldiers Steel, w/release strap; Pocket Ammunition, magazine w/w M-14 Rifle; Belt Cartridge Dismounted w/w M-14 Rifle and Grenade Carrier, Cloth Cotton Duck. To date, all requisitions for wire needed have been outstanding for some time with little or no relief apparent in the near future. Direct liaison is being effected with the Supply Officer of the First Marines and Fleet Stock Account Office at FLSG-A to reduce this problem.

2. Maintenance. 144 Tactical Equipment Repair Orders were submitted to FLSG-A during the month and 37 were completed. The following is a breakdown by section of the work orders submitted and completed:

	<u>Submitted</u>	<u>Completed</u>
Motor Transport	24	5
Ordnance	53	5
Communications	24	14
Supply	43	13

3. Food Services. Food services personnel and facilities encountered no difficulties during the reporting period. The Battalion is currently receiving two "A" ration meals and one "B" ration meal daily. Fresh salad and fruit are available daily.

4. Cantonment and Camp Facilities. The request for 35 tropical huts is still under consideration by higher headquarters. However, during the reporting period continued emphasis has been placed on preparing structures for the rainy season.

5. Transportation and Roads. Roads between Da Nang and the entrance to the Battalion Command Post access road have remained in satisfactory condition excepting that period when heavy rains caused flooding in certain areas. The access road from the Battalion Command Post to Highway #1 has been under constant repair by 7th Engineer Battalion for a majority of the reporting period. Heavy rain coupled with inadequate amounts of proper fill has caused the engineers to effect only marginal improvement.

6. Fiscal. During the month of October, the Battalion obligated \$51,690.85 for stock fund account items.

7. Water. No problems were encountered during reporting period. The water point remains within the Battalion Command Post.

8. Motor Transport. Preventative maintenance is being performed on a continuing basis. Presently, ten Truck Platform, Utility $\frac{1}{2}$ Ton 4X4, M-274's are on deadline for 3rd echelon maintenance and three are awaiting 2nd echelon repair parts. There are three Truck Utility $\frac{1}{4}$ Ton 4X4 M-422A1's awaiting 2nd echelon repair parts and one is receiving an LTI for "X" Coding. Construction of a foul-weather workshop has been completed.

9. Embarkation. The Battalion embarkation posture remains satisfactory. No embarkation or debarkation occurred during the reporting period.

10. Hospitalization and Evacuation. The majority of the battle casualties were evacuated directly by helicopter from the site of injury to "C" Company, 3rd Medical Battalion. The non-battle casualties were, for the most part, referred to the Battalion Aid Station for treatment and disposition; those requiring hospitalization were sent either to "C" Company, 3rd Medical Battalion or the U.S. Naval Support Activity, Hospital, Da Nang.

SECTION VI

COMMUNICATIONS-ELECTRONICS

1. GENERAL. Due to the high influx of new personnel, considerable operational communications training was held during the month.
2. RADIO. The final session of the company operators' school, started last month, was held from the 7th to the 10th of October. Twelve operators attended. A radio section school has been established Monday through Friday from 1300 to 1500. Subjects taught are TADP procedures, operation of radio equipment, and preventative maintenance. A radio telegraph drill net was established on the regimental command net. This net operates Monday, Wednesday, and Friday from 0930 to 1100. The KY-8 radio-crypto system has been installed on the regimental tactical net on an "on call" basis. This net has proved to be an asset when teletype communications fail. Radio set AN/TRC-27B was received by radio relay section. Operational tests have indicated that this new net functions satisfactorily.
3. WIRE. The battalion's wire lines were rerouted from the railroad track to Rwy #1. The loss of wire communications has been greatly reduced by this move.
4. MESSAGE CENTER. During this month the message center section received four men qualified by MOS. Prior to this month there were no message center men qualified by MOS. The new men have started an OJT program within the section.
5. SUPPLY AND MAINTENANCE SUPPORT. The S-4 office of this Battalion has stated that there is an acute shortage of communications wire of all types and supply cannot meet the needs of this Battalion.

SYNOPSIS

22 Oct - Oct 0740H H/SP/2 observed a friendly aircraft pass overhead and noted that 3 rounds of small arms fire were fired at the plane from vicinity BT 020507. From their position at DT 031500 the OP called 31mm mortars which had a good effect on the target. The area was not searched due to the need of the CP to remain unknown. At 1440H H/SP/1 at DT 022570 discovered a road block made from crude materials; again another road block was found at DT 014560. The 1st blockade was blown by M-79 rounds and the 2nd was destroyed by hand. Patrol continued on its mission. At 1515H H/SP/1 at DT 024574

and BT 025574 discovered 2 male VCS in a hut which contained khaki uniforms and a large amount of rice. VCS were taken to DIEN BAN District Headquarters. At 1620H as USMC vehicle crossed bridge at BT 042 621 a M-79 round or rifle grenade detonated. The vehicle continued north without casualties. At 1505H F/RP/3 at BT 015619 received small arms fire from BT 019617 and returned same while commencing assault on position. The patrol observed 10-15 young males fleeing suspected enemy position and an artillery mission was called with good coverage. During assault a M-26 frag grenade was found rigged as a mine thus slowing the advance. The mine was blown in place and the advance resumed but by this time VC had fled in unknown direction. The area was swept with negative results. There was 1 platoon search and destroy patrol; 1 platoon and 2 squad security patrols; 1 platoon recon patrol; 10 squad ambushes; and 4 listening posts during this period.

1. SITUATION.

a. Enemy Forces.

- (1) Enemy activities in this area of operations have been limited to small units of squad or fire team size. However, agents have reported that at least two companies of VC numbering approximately 140 men each and one platoon of local guerrillas are capable of grouping and launching an attack on units operating in this area. These elements are reported to be armed with automatic weapons and mortars; they also have numerous amounts of mines and booby traps. These enemy elements have not been positively identified, however, they are thought to be the Q-15th or the R-25th Main Force Companies. On the western edge of this operating area there are numerous trench lines and caves dug along the railroad bed. There are reported to be tunnels dug under the Song La The river which are used as hiding places in case of attack.
